DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 12-16, 30-35, and 39-54 in the reply filed on October 15, 2007 is acknowledged.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 39-45 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 39 recites the limitation "the street sweeper" in the last line. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number:

Page 3

5. Claims 30, 35, 39, 40, 46, and 51 rejected under 35 U.S.C. 102(b) as being anticipated by Zoni USP 4,884,313.

See the attached marked up cover sheet of Zoni depicting the claimed features.

Claim Rejections - 35 USC § 103

- 6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 8. Claims 12, 13, 31, 32, 41-45, 47, 48, and 53 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marsiglio et al. USP 4,421,228.

See the attached marked up cover sheet and drawing sheet 2 of 2 depicting many of the claimed features.

Marsiglio discloses a belt instead of a pair of chains. It would have been an obvious matter of design choice as to the type of conveyor medium is selected for a particular task based on those particular design features. The examiner takes Official Notice of the equivalence of belts and chains for their use in the conveying arts and the selection of any of these known equivalents would be well within the level of ordinary skill in the art. The same argument can be held for the type of tension adjusting mechanisms as well. The selection of a pneumatic, hydraulic, spring, rack and pinion falls within the level of ordinary skill in the art as functional equivalents as well.

Allowable Subject Matter

9. Claims 14-16, 33, 34, 49, 50, 52, 54 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

- 10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Douglas A. Hess whose telephone number is 571-272-6915. The examiner can normally be reached on M-Thurs 5:30 4:00.

Application/Control Number:

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Gene Crawford can be reached on 571-272-6911. The fax phone number for

the organization where this application or proceeding is assigned is 571-273-8300.

12. Information regarding the status of an application may be obtained from

the Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR. Status

information for unpublished applications is available through Private PAIR only. For

more information about the PAIR system, see http://pair-direct.uspto.gov. Should you

have questions on access to the Private PAIR system, contact the Electronic Business

Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO

Customer Service Representative or access to the automated information system, call

800-786-9199 (IN USA OR CANADA) or 571-272-1000.
